C2Q Testimonial:

Our new interactive configurator we call Configure2Quote has been a hit with Chris Imme of Felling Trailers, Inc. in Sauk Centre, MN.

"It's seamless. It's streamlined," exclaimed Chris at the end of a brief teleconference tutorial on this new tool.

Chris had configured many valves in the past using Prince Manufacturing's more basic Product Configurators online tool, which is available to anyone without a log in. <http://www.princehyd.com/Products/Product-Configurators>

"The error-catching mechanism gives me confidence in my configuration," Chris added. "The previous method of configuring valves did not."

Thanks, Chris, for participating in the training and for your enthusiastic feedback. To arrange your tour of Configure2Quote contact your Prince Manufacturing representative today.
